

**DO LEASED LINE VPNs
LEAVE YOU LOOKING FOR ALTERNATE
WAYS OF COMMUNICATING?**

THEN LOOK TO UUsecuresm VPN. THE IP VPN SOLUTION FROM UUNET.[®]

MAKE YOUR BUSINESS COMMUNICATIONS MORE EFFECTIVE. WITH UUNET'S INTEGRATED, TURNKEY VPN SOLUTION.

Until recently, there was a common perception that the only way to **deploy a reliable, secure, and cost-effective VPN** was through dedicated, private leased lines.

But now thanks to recent technology developments and innovations – there's a new way to achieve **even greater VPN coverage, security, bandwidth, and cost benefits.** How? By **deploying a VPN over a public IP infrastructure.**

And when it's time to implement your IP-based VPN, look to **UUNET — the World's Internet Communications Company.**

UUNET
An MCI WorldCom Company

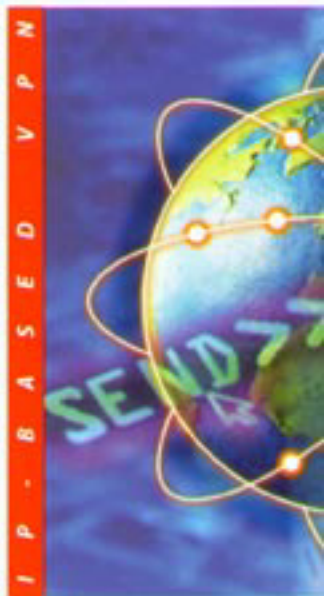

UUNET's UUsecure VPN is a complete, integrated turnkey VPN solution that enables your enterprise to stay focused on its core competencies. Our standards-based, end-to-end managed service integrates routing, VPN, and basic firewall functionality on a common platform. We offer access speeds for VPNs ranging from 1.54 up to 45 Mbps. And our TCP/IP network spans more than **1,000 Points of Presence (POPs)** with over 1 million dial access ports worldwide including a 1/2 million in the U.S.

**SECURITY AND PERFORMANCE,
AT AN ECONOMICAL PRICE.**

UUsecure VPN – UUNET's fully managed, end-to-end IP-based VPN service – enables you to send data across UUNET's global IP infrastructure. You get the security and performance of a private network – at a more economical price.

UUsecure VPN enables you to build a global enterprise network solution **providing dedicated and dial access requirements.** This secure, reliable solution:

- >>> Carries your mission-critical data over the world's most robust IP infrastructure
- >>> Provides global access extending your company's reach
- >>> Gives business partners, suppliers and clients access to your secure network

BACKED BY THE SUPPORT OF OUR GLOBAL NETWORK OPERATIONS CENTER.

With **UUsecure VPN**, UUNET manages **all phases of your VPN implementation and maintenance**. Our Global VPN Network Operations Center (NOC) provides: configuration and design, installation, 24x7 management, global network monitoring, service quality reporting, and proactive trouble shooting.
